QUESTIONS

- Q1 Debug Nested Exception (Solved)
- Q2 Debug Exception Propagation (Solved)
- Q3 Debug Multiple Exceptions (Solved)
- Q4 Debug Finally Block (Solved)
- Q5 Debug the NullPointerException (Solved)

1/5 answered

```

public class Debug4 {
    static int calculateSum(int n) {
        int sum = 0;
        return sum;
    }
    final() {
        System.out.println("Resources Released");
    }
}

public static void main(String args[]) {
    System.out.println("Case 1:");
}

// Debugging Task
// Prevent program termination.
// Ensure the finally block executes while handling the exception correctly.
// Test Case 1
// INPUT: 20
// OUTPUT: Resources Released
// 4
// Test Case 2
// INPUT: 20
// Resources Released
// Division by Zero
// Test Case 3
// INPUT: 0
// Resources Released
// 0
    
```

Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```

import java.util.Scanner;

public class Debug4 {
    static int calculateSum(int n) {
        int sum = 0;
        while (n > 0) {
            sum = sum + n;
            System.out.println("Resources Released");
        }
    }

    public static void main(String args[]) {
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        sum = calculateSum(n);
        while (n > 0) {
            System.out.println("Case 1:");
        }
    }
}
    
```

Test Input

20

Output

Resources Released
4

DEBUGGING AND OPTIMIZATION

10 marks

Q5 Debug the NullPointerException

```

public class Debug4 {
    public static void main(String args[]) {
        String name = null;
        System.out.println(name.length());
    }
}

// Expected Task:
// Prevent the program from crashing.
// Test Case 1
// INPUT: Java
// OUTPUT: length is 4
// Test Case 2
// INPUT: null
// OUTPUT: String is Null
// Test Case 3
// INPUT: Programming
// OUTPUT: length is 11
    
```

Debugging Task: Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```

import java.util.Scanner;

public class Debug4 {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String name = sc.nextLine();
        if (name == null) {
            System.out.println("Name is Null");
        } else {
            System.out.println("length = " + name.length());
        }
    }
}
    
```

Test Input

Java

Output

length = 4
